160mm	1350mm Provided with 1m drop rod Additional drop rod length charged per m	Order to required hanging height	1 - G9	5W	2.5Kg	100mm dia. x 25mm depth	

General:

IP44 pendant kits are provided with drop rods in the same metalwork finish as the pendant kit. The standard drop rod length is 1m with additional lengths charged per m.

All measurements and weights are approximate - our lights are hand crafted so there will be some variation.

Lab certified to IP44 for use in bathrooms. Please check with your electrical contractor prior to ordering.

Made to IEC Standards designed to operate at 240V/50Hz. Certification for National Differences e.g. AS/NZS is available on request.

Supplied with high quality G9 light sources included.

Assembly:

Crystal Pendant Lights will arrive with the crystal packaged separately in strands (this is common practice and is done to prevent damage to the crystal in transit). All you need to do to assemble your light is to hook each strand onto the frame with the hooks provided.

You will need a qualified electrician to install your light.

Our lights come with comprehensive installation instructions. They shouldn't need much maintenance, but we give you some information on that too.

Packaging Information:

Please contact us for packaging information on smaller products as the box weights and dimensions are dependent on the quantity of lights in the order.

Made in England.

All of our lights are designed and manufactured in England by skilled craftsmen and women.

All designs are copyright to Tigermoth Lighting Ltd.

WEEE Registration Number: WEE/BU3809XD

Tigermoth Lighting is a Lighting Industry Association Quality Assured Company.
