General:

The Blossom Cluster Chandeliers have been pre-programmed to set lengths. These lengths create the natural distribution of the individual Blooms and can either be adjusted at installation or pre-programmed to your desired height by our workshop prior to delivery.

The chandelier is made from natural brass with a gold wax coating – this delivers a soft Gold finish and the ceiling rose and delicate chains that support each bloom are also finished in a soft Gold.

All measurements and weights are approximate - our lights are hand crafted so there will be some variation.

Made to IEC Standards designed to operate at 240V/50Hz. Certification for National Differences e.g. AS/NZS is available on request.

We supply our own high quality LED Light Sources with this chandelier, for more information on their light output please contact us. This chandelier has a transformer – for more information on compatibility with dimming systems, please contact us.
